Professional Summary

Full-stack developer with hands-on experience across React Native, Python, and cloud/CRM platforms including Firebase, PostgreSQL, and Salesforce. Delivered a capstone AI legal-aid mobile application from frontend to backend and built a responsive POS and inventory system during an IT internship. Magna Cum Laude graduate in Information Technology (Web and Mobile Application) with strong problem-solving, collaboration, and adaptability skills and a strong desire for efficiency and automation.

Education

Bulacan State University Bachelor of Science in Information Technology, Web and Mobile Application. GPA: 1.25 Honors: President's List (2024 - 2026), Magna Cum Laude	Malolos, Bulacan 2026
Colegio De Calumpit Inc. Senior Highschool Diploma (TVL-ICT Strand) Honors: With Honors (2021 - 2022)	Calumpit, Bulacan 2022

Experience

IT Intern Zwart Trading OPC – Sole Avenue	Jan 2026 – March 2026
- Engineered the full-stack development of the responsive POS system of the company using Google App Scripts with Google Sheets for backend logic, focusing on responsiveness, functionality, and alignment with business requirements of the company, debugging transaction and data-sync issues to maintain data integrity across transactions. - Managed the operations and provided solutions for integrating the company's traditional inventory records into Zoho Inventory, reducing redundant manual data entry and cleaning up recurring reconciliation errors.	
Full Stack Developer — AI Legal Aid Mobile Application (Capstone Project) Bulacan State University	Jan 2025 – Nov 2025
- Implemented React Native frontend of the capstone system with a modular component architecture and efficient state management to keep user workflows fast and intuitive. - Developed the backend system using asynchronous chatbot logic, REST API integrations, Retrieval-Augmented Generation (RAG) which retrieved from over 20,000 legal documents, and secure database connections to deliver real-time AI-assisted legal aid responses to users. - Coordinated frontend-backend integration, version control, and task distribution across the full SDLC, from planning through testing and deployment to deliver the capstone on schedule.	
Virtual Intern — Salesforce Virtual Internship Program Online (Philippines)	Mar 2025 – May 2025
- Built and configured Salesforce CRM apps, applying data modeling and workflow automation features to improve process efficiency. - Applied hands-on Salesforce training to model relationship-management data and streamline business processes within the platform.	

Skills

Programming: PHP, Python, JavaScript, Java, C++, C#
Frontend Development: React, React Native, HTML, CSS, Google App Scripts, Tailwind
Backend & Databases: Node.js, REST APIs, Firebase, MySQL, PostgreSQL
Frameworks & Tools: Git, GitHub, Android Studio, Visual Studio Code, Figma, Zoho Inventory, Docker, Shopify
Soft Skills: Team Collaboration, Problem-Solving, Adaptability

Certifications & Trainings

- Salesforce Supported Virtual Internship Program 2025 – Philippines (May 2025)
- SpeakIT: Cracking the Code to Effective Communication (November 2024)
- iLEAP course on Intellectual Property (December 2024)
